1. INTRODUCTION

1.1 Mission and Strategic Goals

Daybreak University's leadership seeks to establish a strong culture of planning at the university with the intent of advancing the university's mission in a rapidly changing environment. This strategic plan, which will guide the university for the next five years, is integral to that effort.

The mission of Daybreak University is:

*The mission of Daybreak University is
to be a facilitator for the students' self-actualization,
in spite of the darker side of their lives.*

*Daybreak University
provides rigorous education that inspires spiritual healing and transformational change in
individuals, couples, families, and communities
through professional research, academic and
practical excellence, and a compassionate heart of God.*

*The vision of Daybreak University is
transforming the world by changing one relationship at a time.*

While the institutional mission remains constant, how we fulfill it may change over time. While developing this document through conversations among board members, administrators and faculty members, several central themes emerged, ultimately coalescing around four strategic goals. The following mid-range goals articulate how the university will fulfill its mission.

Strategic Goals

1. Build a dynamic community.
2. Advance superior student learning.
3. Create a culture of evaluation.
4. Develop adequate resources.

In order to determine our progress, these strategic goals will be measured periodically at the university and unit levels. The educational and administrative units of the university will align their decisions as closely as possible with this strategic plan.

1.2 Planning Process

The strategic planning process at Daybreak involves the development of a 5-year strategic plan that addresses our current needs and relates to the actual decision-making process of the university.

The strategic planning includes:

1. Reporting the accomplishment of goals with substantiating evidence.
2. Revision of existing strategic goals that have been established by prior strategic planning in response to new circumstances or changes that have occurred.
3. Incorporating recommendations that have been made by units of the university as well
 1. as by state, federal, or accrediting agencies.
4. Developing new goals in anticipation of new initiatives by units of the university.

This strategic plan specifies strategic goals in terms of strategic objectives and actions, which identify multiple ways to make significant progress on the goals over a period of five years. Concrete decisions concerning these objectives and actions are part of the implementation stage of the strategic plan. In developing multiple objectives and actions to achieve a goal, we also specify the following related elements to guide the action steps.

- Target achievement date
- Key responsible personnel
- Criteria for success
- Description of resources needed
